Mitsubishi Triton MN/ML 2008-2015	RVSK115 	RCC351	Z980K	2021

"We firmly believe that the Ryco RVSK series are the quickest, easiest and most professional fuel filter and catch can combination set up on the market. We highly recommend anyone thinking of using a catch can and/or a prefilter should pick up a kit for their vehicle. The piece of mind given to us and our customers, whose vehicles we have fitted these systems to, is unmatched. Knowing the cost savings and protection offered to peoples pride and joy by fitting these to their vehicles is great. Between the form fitted hoses, custom bracketry and clear instructions any gearhead should not have a problem getting these fitted with the most basic tools. Trying to compare the Ryco kits to other brands on the markets is almost impossible as Ryco are in a league of their own."

Nathan Roberts, Ultra Lube Mechanical Workshop, Repco Authorised Service, Midland WA.

Praise for the RVSK...
