Philips Healthcare launches blockchain lab in Netherlands

“we’re strategically moving away from healthcare”

Gem

Chief Communications Officer

“[…] we’re too early into the market and while big companies are educating themselves with our help, the big contracts seem years away. We did an exhaustive analysis and decided to go back to our roots in cryptocurrency which is where the real blockchain users are today — the investors.”

Gem

Chief Communications Officer

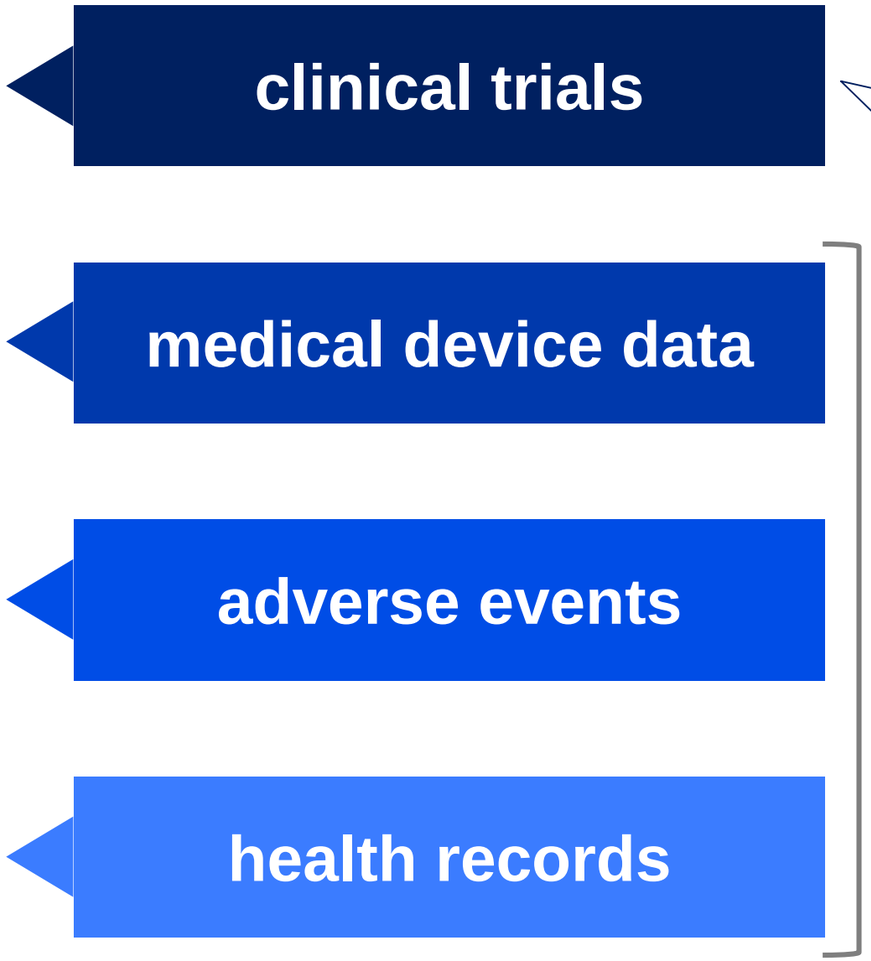
Deloitte. and IBM reporting on blockchain in healthcare



“[…] clinical trials management stood out. It is the only area that was ranked in the top three benefits by all surveyed healthcare organizations. It also claimed the top spot for new business models […]”

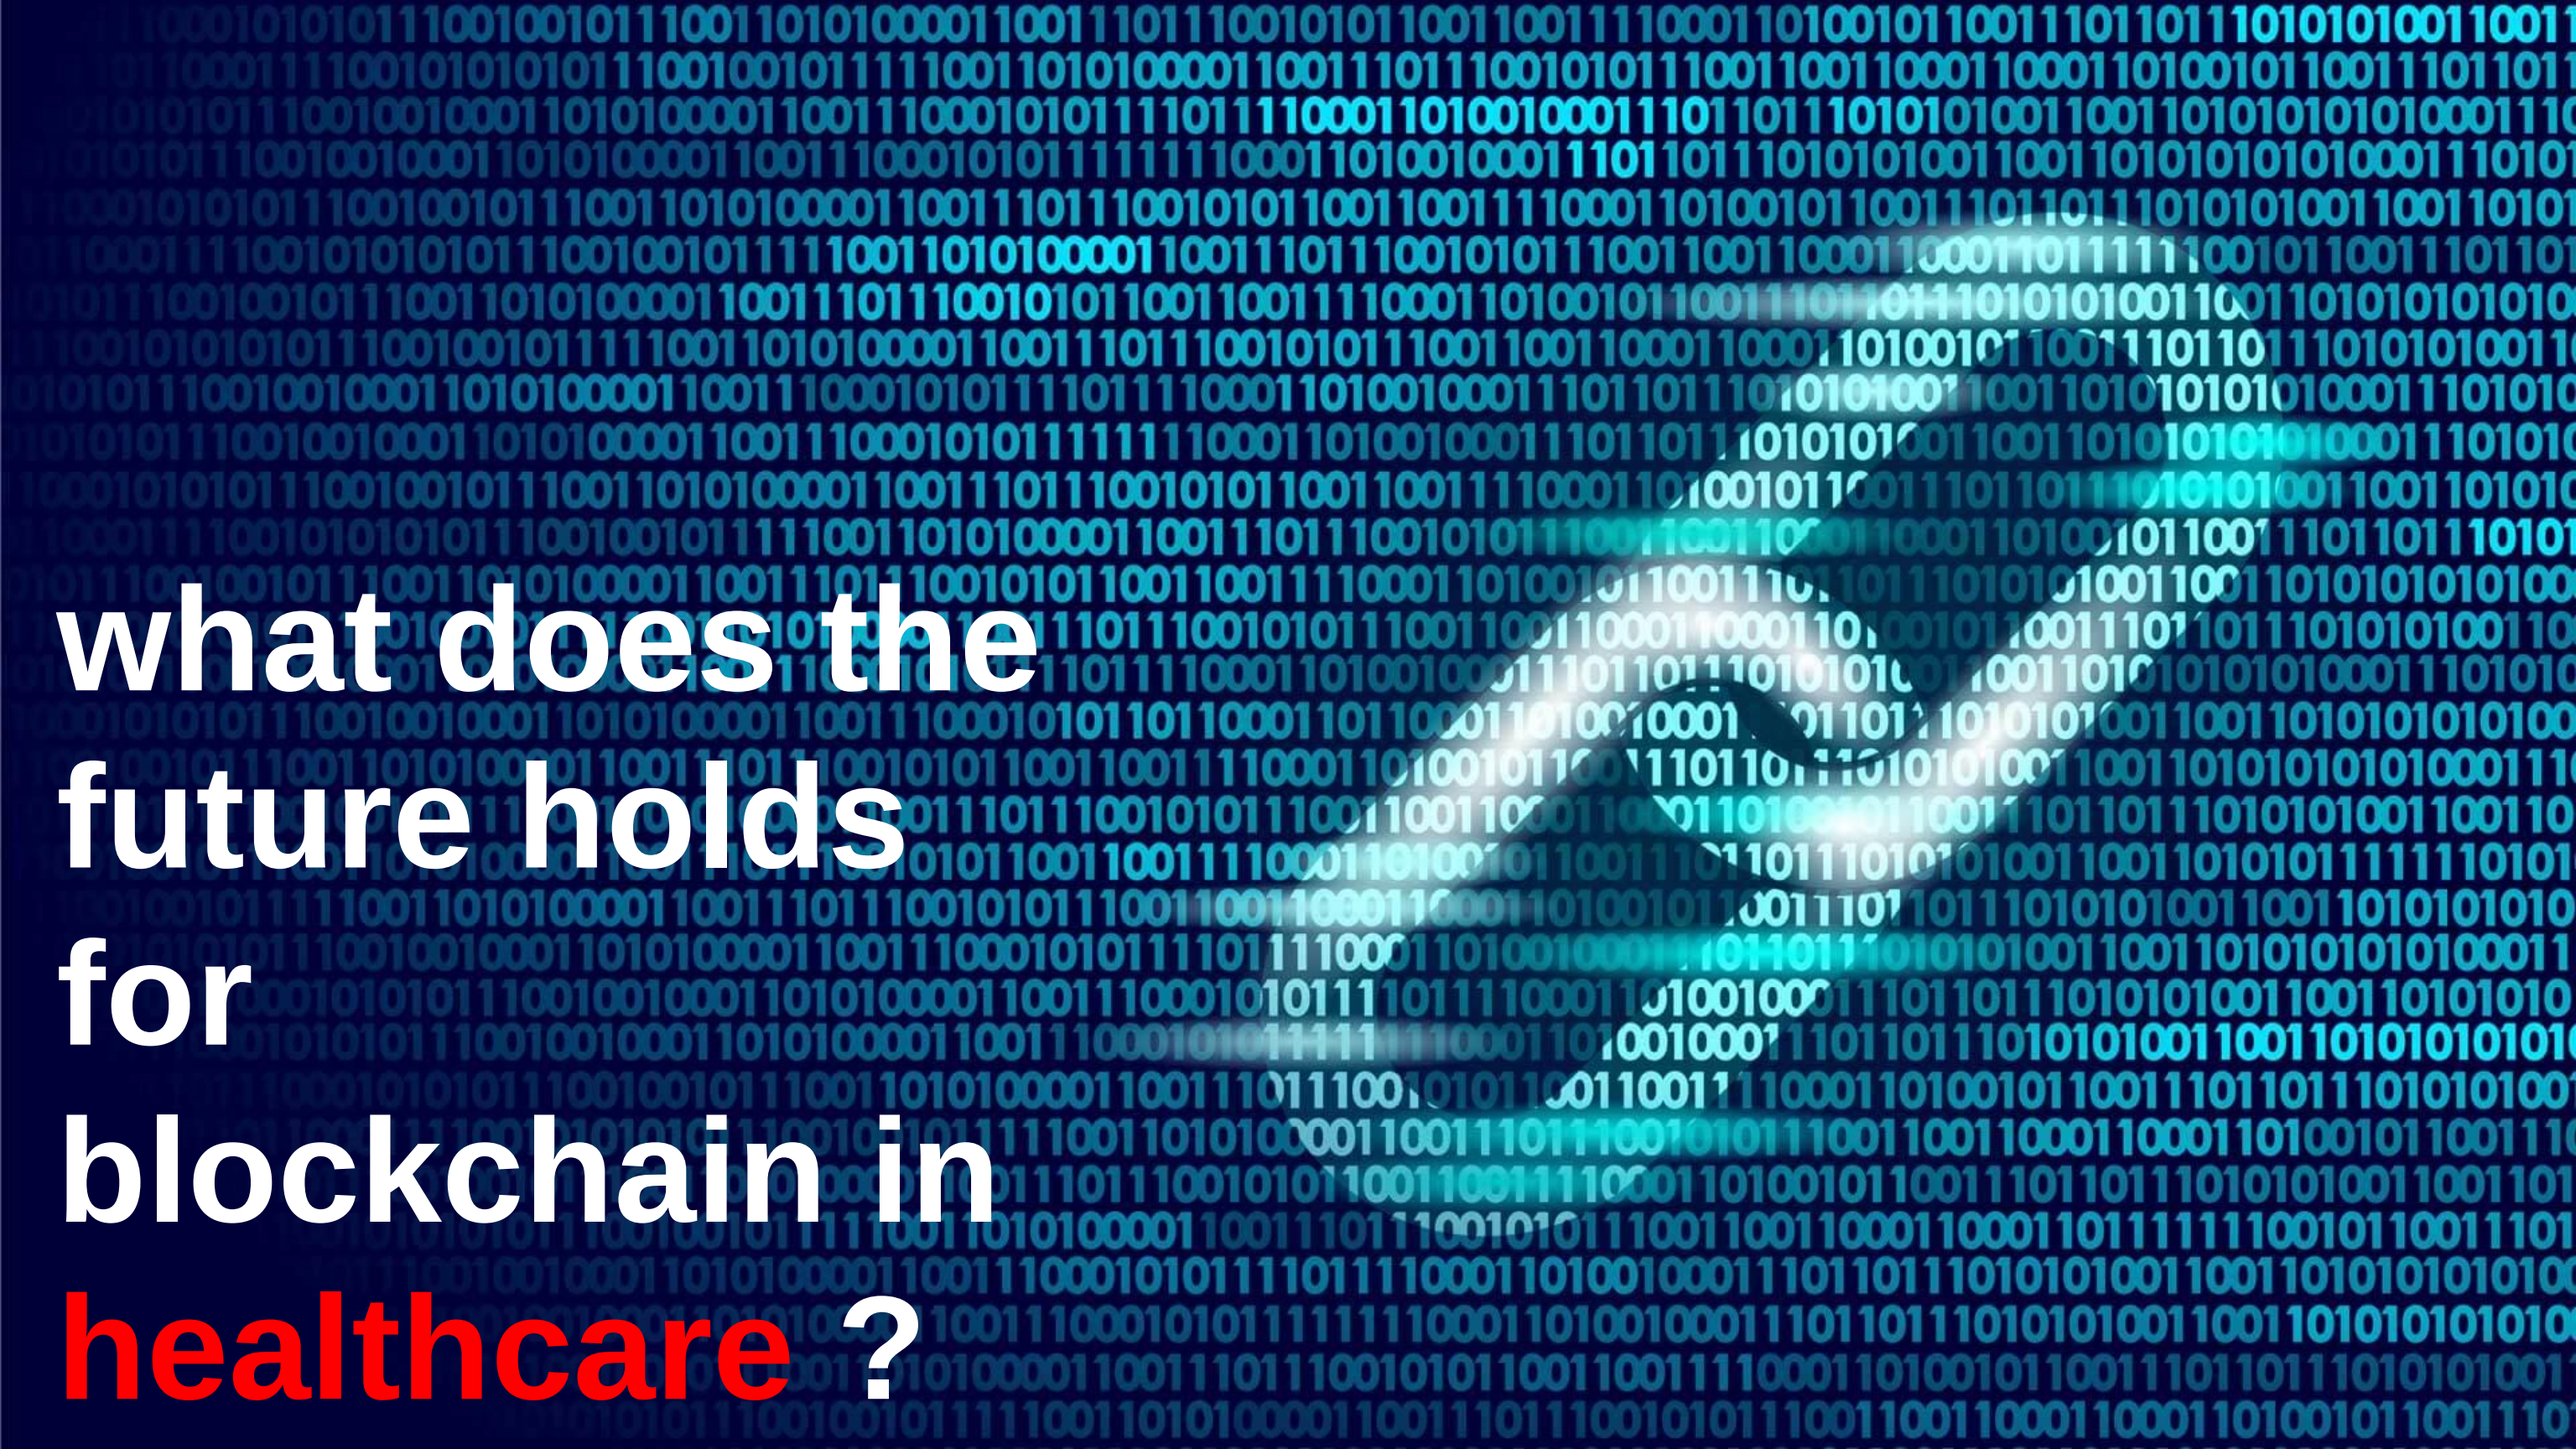
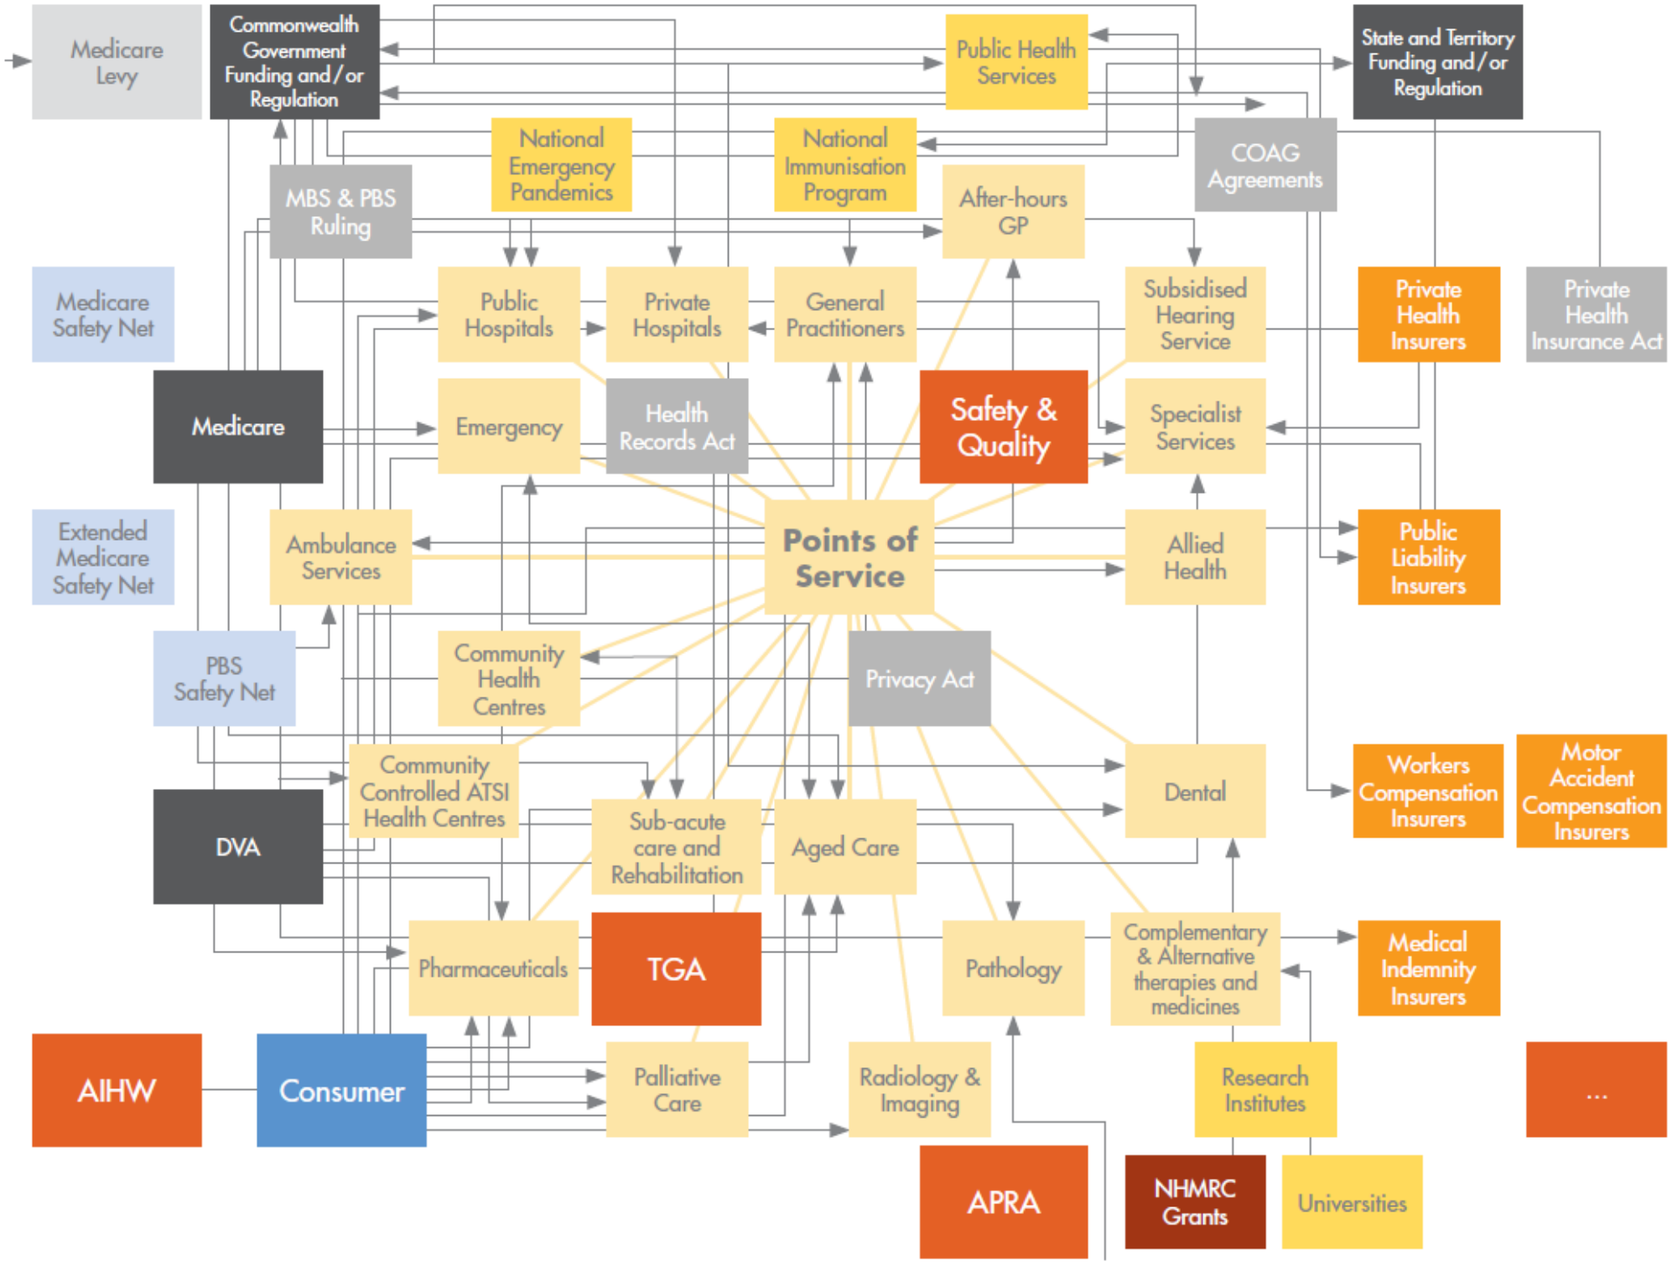
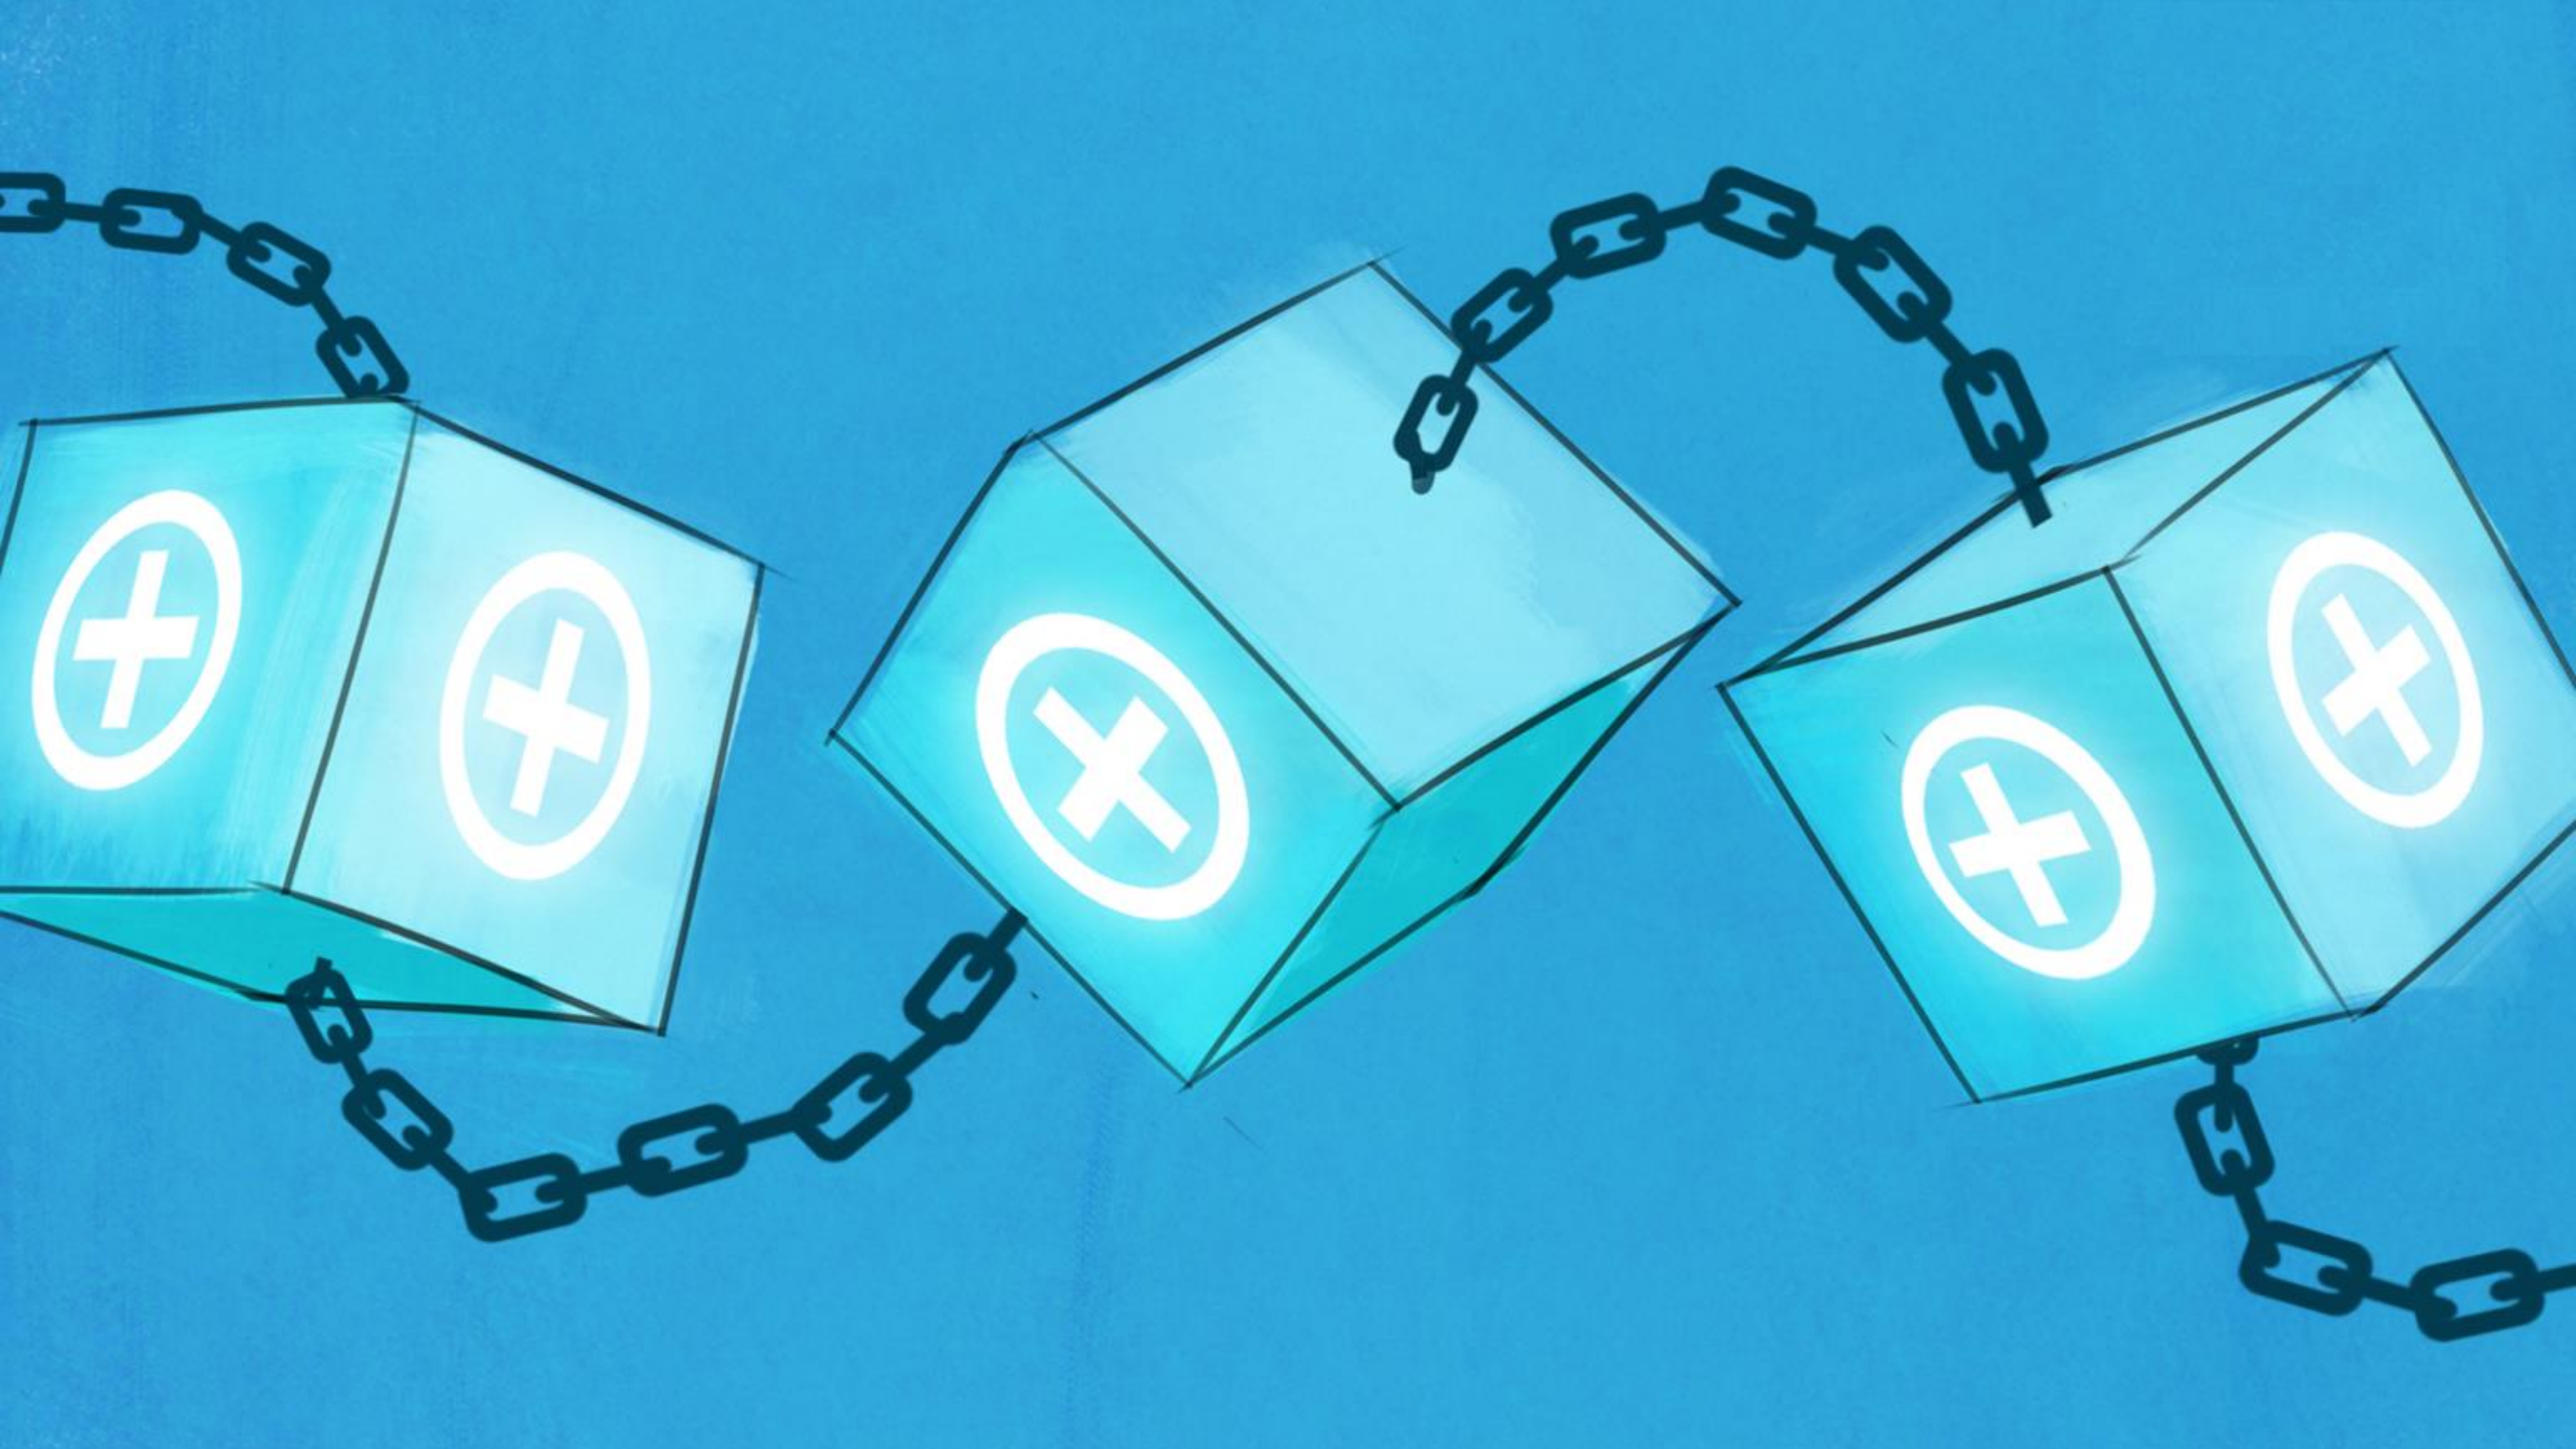
Have an update for the map? DM @andreacoravos or submit a pull request via our GitHub repo.



what does the future holds for blockchain in healthcare ?



*https://flyingblind.cmcrc.com



and if blockchain is still a mystery...

Thank you.
