

ENVIRONMENTAL MANAGEMENT CONTROL YOUR LAND FILL OR TRANSFER STATION

What EPA expects from your business:

EPA expect **businesses** to build knowledge, capability and capacity to **prevent** environmental harm. **Business owners** or **operators** must learn what their **obligations** are and **comply** with them.

Your business **must**:

- assess risks of harm to **human health** and the **environment**
- put processes in place to **minimise risks**
- respond quickly and seriously to EPA's advice and suggestions, making changes when needed
- work to **minimise environmental impact** and repair damage
- answer questions and provide information.

You must **report pollution incidents** and respond when EPA raises issues.

You must also report any **breach of your EPA licence**.

In today's world, environmental control is not only a legal requirement but also a social requirement.

Businesses and councils need a management system to meet EPA requirements.

• Environmental Management Systems	• Environmental Management Plans
