WHY RYCO?

AUSTRALIAN OWNED & TESTED

When three Melbourne-based automotive pioneers came together over 80 years ago, little did they know they were on the verge of establishing one of the biggest, and most trusted Australian-owned automotive brands – Ryco Filters.

Across eight decades, with a commitment to continually innovate, to the implementation of new technologies and cutting-edge manufacturing techniques, and with quality as the centrepiece of its focus, Ryco has become one of the most important brands in the automotive business. One that has been embraced by customers, suppliers and original equipment manufacturers.

This doesn't just happen, trust in your product has to be achieved. To ensure we stand out from the crowd, and to prove our product is a market leader, Ryco established Australasia's only dedicated filtration laboratory.

Here, Ryco engineers carefully test all filters under Australian conditions to ensure they meet or exceed original equipment specifications. Tested according to SAE and ISO industry standards, our filters offer peace of mind for optimum engine protection, guaranteed.

GENUINE PERFORMANCE

Ryco's design philosophy is to give you quality filters that meet or exceed original equipment manufacturer specifications. To reach this level of genuine performance we believe a filter must achieve in three critical areas - Efficiency, Life and Flow.

A good performing filter must excel in all three critical areas to be deemed fit to do the job, every time. Efficiency focuses on the percentage of dirt that a filter removes. Life considers how long a filter lasts before clogging up. And flow determines how easily air, oil or fuel flows through the filter.

The Ryco engineering team conducts regular product testing right here in Australia to ensure you are getting the optimum filter, so that the Ryco name continues to provide you with genuine high quality performance filters, that you can trust.

It's what we call 'The Ryco Difference', and it's what sets us apart from all of our competition, and why Ryco is Australia's favourite filter brand, guaranteed.

AUSTRALIA'S FAVOURITE FILTER BRAND

Ryco Filters is Australia's favourite filter brand because every decision we make, every product we manufacture and everything we do to support the brand is for the benefit of our customer.

It's why Ryco has the broadest range of vehicle filters and specialist filter programs, because our customers demand it.

Our laboratory-tested products meet and exceed original equipment quality specifications, so you know that you can trust them to perform as expected every time you start your vehicle.

Ryco offers the most comprehensive national distribution network so that you can always get Ryco products when and where you need them.

Our specialist customer support team is an outstanding group of dedicated automotive professionals who know everything about our product, can connect you to the right Ryco technician and can answer every question.

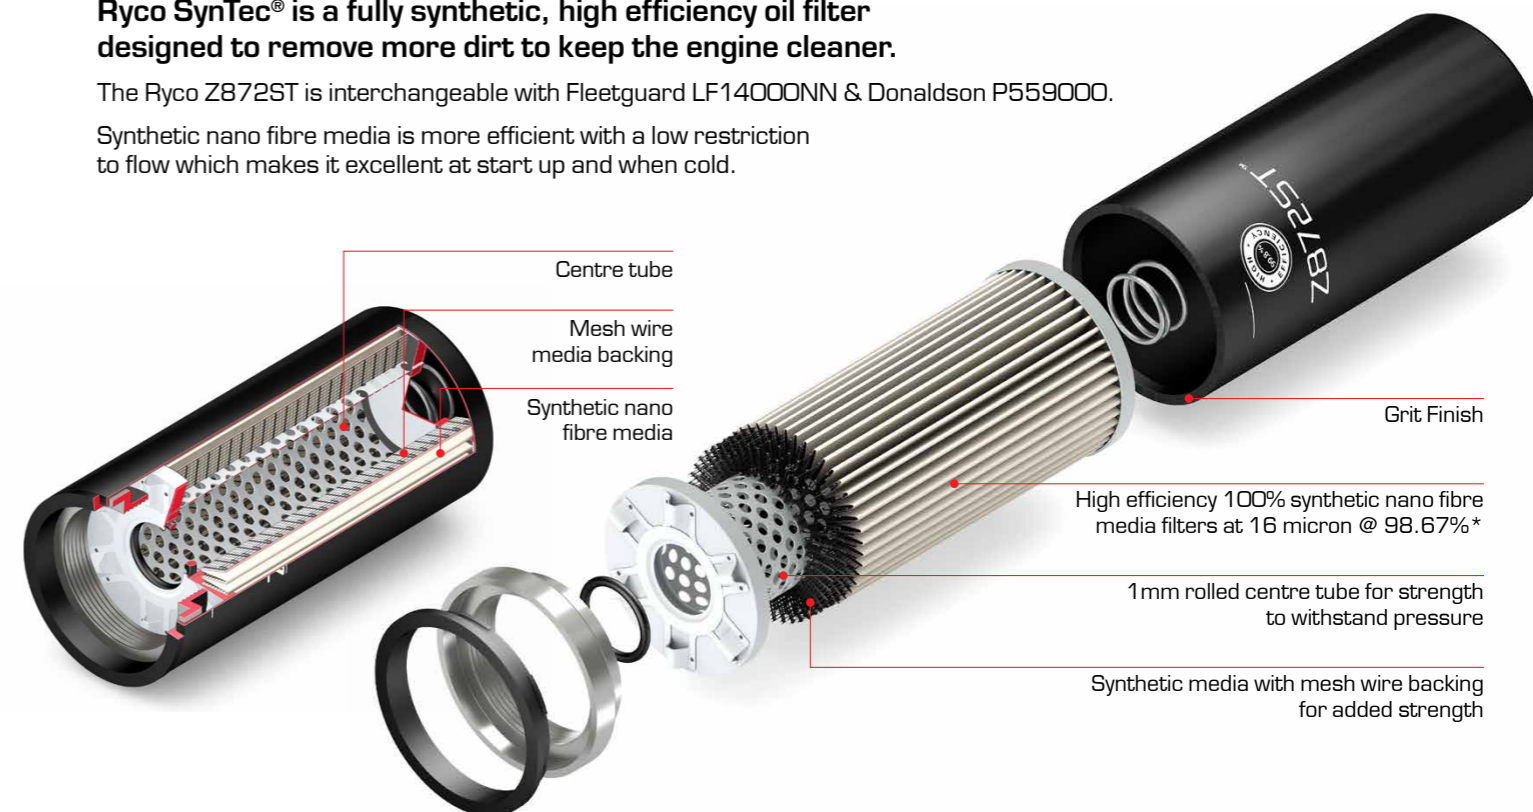

Decades of experience means we know filters inside and out. It's why you can count on Ryco every time, guaranteed.

Z872ST RYCO'S HIGH EFFICIENCY OIL FILTER

Ryco SynTec® is a fully synthetic, high efficiency oil filter designed to remove more dirt to keep the engine cleaner.

The Ryco Z872ST is interchangeable with Fleetguard LF14000NN & Donaldson P559000.

Synthetic nano fibre media is more efficient with a low restriction to flow which makes it excellent at start up and when cold.

PRODUCT HIGHLIGHT

HDA5986

RYCO Primary Air Filter

Interchangeable with:

> OE Manuf.	OE No.
Fleetguard	AF1968M
Donaldson	P153551
Baldwin	PA2705

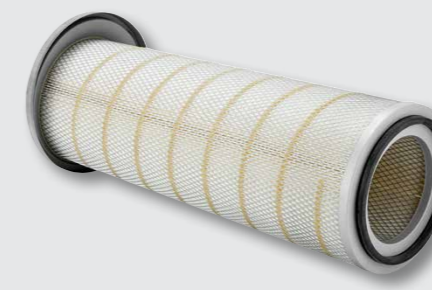

Suit mainly Kenworth trucks including various "K" and "T" series across a wide range of engine makes. Also has applications in Freightliner, Western Star and Mack. Note - as many truck models can have varying air intake systems, verify correct filter by cross reference

HDA5979

RYCO Primary Air Filter

Interchangeable with:

> OE Manuf.	OE No.
Mack	57MD42M
Fleetguard	AF1969M
Donaldson	P150695
Baldwin	PA2680

Suit Mack trucks including Superliner, Trident and Titan with engines including Mack E7 / Cummins ISX /Cat C15. Also suits some Kenworth K104 and K108. Note - as many truck models can have varying air intake systems, verify correct filter by cross reference

*Testing in accordance with ISO4548-12:2000
