# BACKGROUND

A look through our history

# What users and Providers were saying...

Initial Anecdotal feedback- <https://vimeo.com/229928955> (from 1.31)

Reducing Depression Study- Agewell <https://vimeo.com/300211237>

# Agewell Study

Questions- Compared to when you started, are you now

- Less bored
  - Have more interests
  - Go out more
  - In better spirits
- 
- 100% correlation to those using Tablets/ devices more than 20 Minutes /day, and a reduction in depression indicators
  - 84% of users using device more than 20 minutes per day- all were first time users
  - Led to Federal Government Funding for Academic Study by QUT- Professor Elizabeth Beattie

# QUT Study

- Ethics Approval May 2019
- Study to be finished in June 2020
- Process- Data Collection process
  - All are first time technology users- base line survey at beginning of use
    - Each use- Who is using device, intent of use, and how do you feel
  - Further data collection at 6 week and 12 week periods

# Trend mood and feedback

# Data Collection

| Outcome measure   | Assessment tool   | Method of collection                                 | Frequency of data collection                           |
|---|---|--|--|
| Demographic information: age, gender, nationality, marital status, education level, previous tablet use, medical conditions | Questionnaire developed by the research team (Appendix 1)   | RA – in person interview                             | Baseline   |
| Social connections: usual/actual visitors, usual/actual reasons for leaving bedroom   | Questionnaire developed by the research team (Appendix 1)   | RA (baseline) and embedded questionnaire in platform | Baseline and then before each use of the platform      |
| Functional Ability  | Lawton's IADL (Graf, 2008) (Appendix 2)   | RA to collect during interview (baseline)            | Baseline   |
| Global Cognition  | Clinical Dementia Rating Scale (CDR) (Morris, 1997) (Appendix 3)  | RA – in person interview                             | Baseline –confirm eligibility: score < 1               |
| Mood: Anger, Disgust, Fear, Happiness, Sadness, Surprise  | Ekman's Mood Faces - happiness, anger, surprise, disgust, sadness and fear (Ekman et al., 1987). (Appendix 4) | Embedded in platform                                 | Prompted to choose a mood each time the tablet is used |
| Depression  | Geriatric Depression Scale (GDS) (Yesavage & Sheikh, 1986) (Appendix 5)                                       | RA – in person interview and Online survey           | Baseline, at 6 weeks and 3 months                      |
| Loneliness  | Three item Loneliness Scale (Hughes, Waite, Hawkley, & Cacioppo, 2004) (Appendix 6)                           | RA – in person interview and Online survey           | Baseline, at 6 weeks and 3 months                      |

# Usage Mapping

## Next steps- QUT Report

- Map the components of the platform that have the biggest impact on reducing depression
  - Reconfigure platform to push those items to the front when mood changes
- Initial report due July 2020

# Care Recipient Independence- Quality and Compliance outcomes

## AGED CARE QUALITY STANDARDS

### Standard 1 : Consumer Dignity And Choice

Thank you to those involved in the various stages of the study

Providers who have been involved in the process

# Client's Perspective
